If you have no previous experience with Photoshop, start with Photoshop Elements. Start with the short version of this book, and then continue when you're ready with the longer, more advanced version. The two share many of the same features, which saves you from having to learn two different programs. Weighing the pros and cons of Photoshop Every tool has strengths and weaknesses. Photoshop is no exception. In fact, the program has many advantages and disadvantages. Like many tools, Photoshop has detractors, so here are my top five reasons why you should give Photoshop a try. Advantages: Photoshop: An excellent image-editing tool. Its interface is easy to use and enables you to create and manipulate images with ease. Photoshop Elements: Great for photos and videos. The program is inexpensive and, with its lesser editing capability, is often good enough for beginners. Adobe Fireworks: The only vector image-editing program I recommend, Fireworks is a very easy-to-use program. It's best for the nonphotographers in your life. GIMP: Even though I present this as a vector program, GIMP does have raster capabilities. However, it's not as advanced and is best for the hardcore GIMP users. QuickandDirtyTips.com: A Photoshop experimentation site. The program doesn't come with any tutorial — you can pretty much create anything you want, and you will find some great, amazingly simple solutions on this site. Here are the top five disadvantages to Photoshop. Disadvantages: Photoshop: Impossible to do pixel-by-pixel editing, which makes it slow and expensive. You can, however, run Photoshop under the Adobe Bridge system that enables you to do that. Photoshop Elements: For the most part, Photoshop Elements doesn't provide editing capabilities beyond those of its older siblings. It doesn't enable you to create, edit, and publish your own images. Adobe Fireworks: Fireworks does have some editing capabilities, but if you're looking for pixel editing, you'll find little support. GIMP: GIMP is the most advanced vector-painter, but although it is easy to learn, you will need to learn some intricacies of GIMP if you want to create your own pictures. Christopher Columbus Resources General history A picture is worth a thousand words, or so the saying goes. It is easy to look at a small town's street sign, memorize its name, then later look it up in an atlas or encyclopedia only to realize it can give you a lot of information. Such was the case for Columbus. The town's name was pronounced Kois-low-ohs by the early settlers. After the Civil War, a headline appeared in a local paper. The headline read: "Cry of Koislowohs is heard throughout the land." After 1875, Columbus was officially named Columbus, Ohio. Though the town was never a very large city, it is, however, much larger today than it was over a century ago. Columbus is the second largest city in Ohio, with a population of 250,000 and growing. Columbus is also known as a center of business, industry, culture, education, technology, and tourism. A bustling downtown, numerous restaurants, entertainment venues, shopping centers, and fun events give Columbus residents and tourists something to look forward to every day. This comprehensive record of Columbus, Ohio, offers local history in a fun and interesting way. Whether you are researching your family's roots, or just trying to find out some more about the fascinating city in which you live, you'll find what you're looking for. Keeper Edition A subscription to the Keeper's Edition of this book contains a map of Columbus, Ohio and 6.5 different historical data sets which can be navigated and searched like any other database. Look for the "Keepers Edition" banner on the top right of this page.Q: How to get all custom fields using the get\_posts\_custom\_meta\_box function I'm using a loop that displays a bunch of posts from a specific category. In this loop I'm using the get\_posts\_custom\_meta\_box function to give some basic meta data to the posts. The custom field name is 'meta\_keywords'. I've been using the following code to output the custom field: `jQuery(document).ready(function($){ $(document).on("keyup", "#keyword", function(){ var text`

### What's New in the?

Q: SQL, duplicate records I have this table: 

date	user	job	location
2016-10-16 15:46:31.000 (local)			
2016-10-16 15:46:31.000 (local)			
2016-10-16 15:46:31.000 (local)	john smith	web design	London
2016-10-16 15:46:31.000 (local)	john smith	web design	London
2016-10-16 15:46:31.000 (local)	john smith	web design	London

 What I want to achieve is get 3 records from my table with latest result. In this case, the result should be the first record: 

date	user	job	location
