## **Elden Ring X64**

The Elden Ring are a growing race of creatures who have forged a “chain” of mana from the power of the spirits of the light. With the Mana of the spirits bound to their bodies, they have the power of the spirits and are perfect under the guidance of the Light. The standard way to play the game is solo in a party. This limits you to an active party, but it will decrease the burden on the server. The mission for each individual character is to obtain quest information, travel to the location, defeat enemies, and collect items or materials. NPC party members with various statuses, such as active and passive, also exist in the world of “The Lands Between”. Global monster formations, such as a formation of hordes, a group of assault monsters, and a group of defensive monsters, can be arranged and controlled by the player. Enemies have special qualities in terms of appearance. In particular, a subspecies that is marked by its large size or strong magic power will appear on the map when the player is under attack. The number of enemies

---

increases when the player is attacked by a horde. Certain monsters have special attack patterns, making it necessary to anticipate attacks. Three difficulty levels exist: easy, normal, and hard. When you start the game, the difficulty is set to easy, and increases gradually as you progress through the stages. The character of each difficulty level has a different quantity of experience points. The experience points for the easy difficulty level are obtained from the EXP in dungeons. The normal difficulty level includes EX dungeons, in which the EXP are obtained by defeating monsters, and LS dungeons, in which the EXP is obtained by defeating monsters and gaining experience through special events. The advanced difficulty level is obtained by acquiring a maximum EXP. EXP gains cannot be distributed to the limit on these levels, and will not be distributed unless the EXP gains have been acquired through physical activities. The characters have their own level and experience points. The characters also have their own growth levels, which are measured by the number of levels completed

---

from 0 to 20. If a new level is obtained, the player can obtain the corresponding experience. Thus, the experience points for the maximum level can be acquired by repeatedly leveling up. The experience points for the best level can be obtained by completing the “Quest of the Chapter”. “Quest of the Chapter” is a quest that is obtained when the chapter is completed.
