Anonymous - February 1, 2017 I love this. It's an amazing program. I have it on all my systems. It is extremely efficient. I have a set of very important tasks in my life that I keep doing, constantly. Some of them are repetitive and would add a lot of time and aggravation if I had to do them every time. Perfect Hotkey does it for me. I can watch a movie, take a look at my mortgage statement, or turn on my printer while I'm cooking dinner, without having to check if the status has changed when I get back to the computer. I just hit a simple hotkey, and everything I want to do is done. If you're serious about your productivity, you should consider investing in a Perfect Hotkey. I'm very happy with this product. Anonymous - December 27, 2016 It's nice to have all my hotkeys here! It works very good! I'm impressed with the speed it works, I've made one shortcut, but I can only control my small business if I connect the mouse to the computer. It's not perfect Anonymous - December 19, 2016 I really like perfect hotkey. It makes my life easy. I use a Windows laptop and I have to use it, and I like to use it also on my raspberry pi. Would be nice if there was a simple way to remove a hotkey without the loss of all the settings of the hotkey. It does not work with more than one program Anonymous - December 3, 2016 I had a problem when I tried to use a key
